KLE SOCIETY'S Smt. C.B.R. School Athani, Karnataka

CBSE - 80.2   2018

SKILLS

Technical: Core Java, OOPS, SQL
Front-end: HTML, CSS, Javascript, React.js
Back-end: Node.js, Express.js

PROJECTS

Interactive portfolio website
- An interactive portfolio website built with HTML, CSS, and JavaScript highlights a user's skills, projects, and experience through a dynamic and visually appealing interface.
- It incorporates interactive elements like smooth scrolling, animations, and responsive design to engage visitors and provide an immersive browsing experience.

Myntra clone app
- A Myntra clone app created using HTML, CSS, and JavaScript is essentially a basic e-commerce platform that mimics the design and functionality of Myntra, a popular fashion retail website.
- It allows users to browse products, add them to a shopping cart, and simulate a basic checkout experience, all while offering a responsive, user-friendly interface.

Credit Card Fraud Detection
- Includes modeling past credit card transactions with knowledge of fraudulent ones to identify new fraudulent transactions. The goal is to detect 100% of fraudulent transactions while minimizing incorrect classifications.
- Identifies fraudulent transactions by modeling past credit card transactions and knowledge of fraudulent ones, aiming to detect 100% of fraudulent transactions while minimizing incorrect classifications.

INTERNSHIP

Zeel Code Labs

Learned Java programming OOPs concepts, MySQL, and SQL. Worked with databases, writing queries, understanding schema, and optimizing performance.

AiROBOSOFT Products And Services

Completed a one-month internship in the data science field, where I gained hands-on experience and worked on a data-driven project, applying key techniques to solve real-world problems and enhance my skills in data analysis, machine learning, and data visualization.
